

# **12<sup>th</sup> Word Conference**

## **International Raspberry Organization**

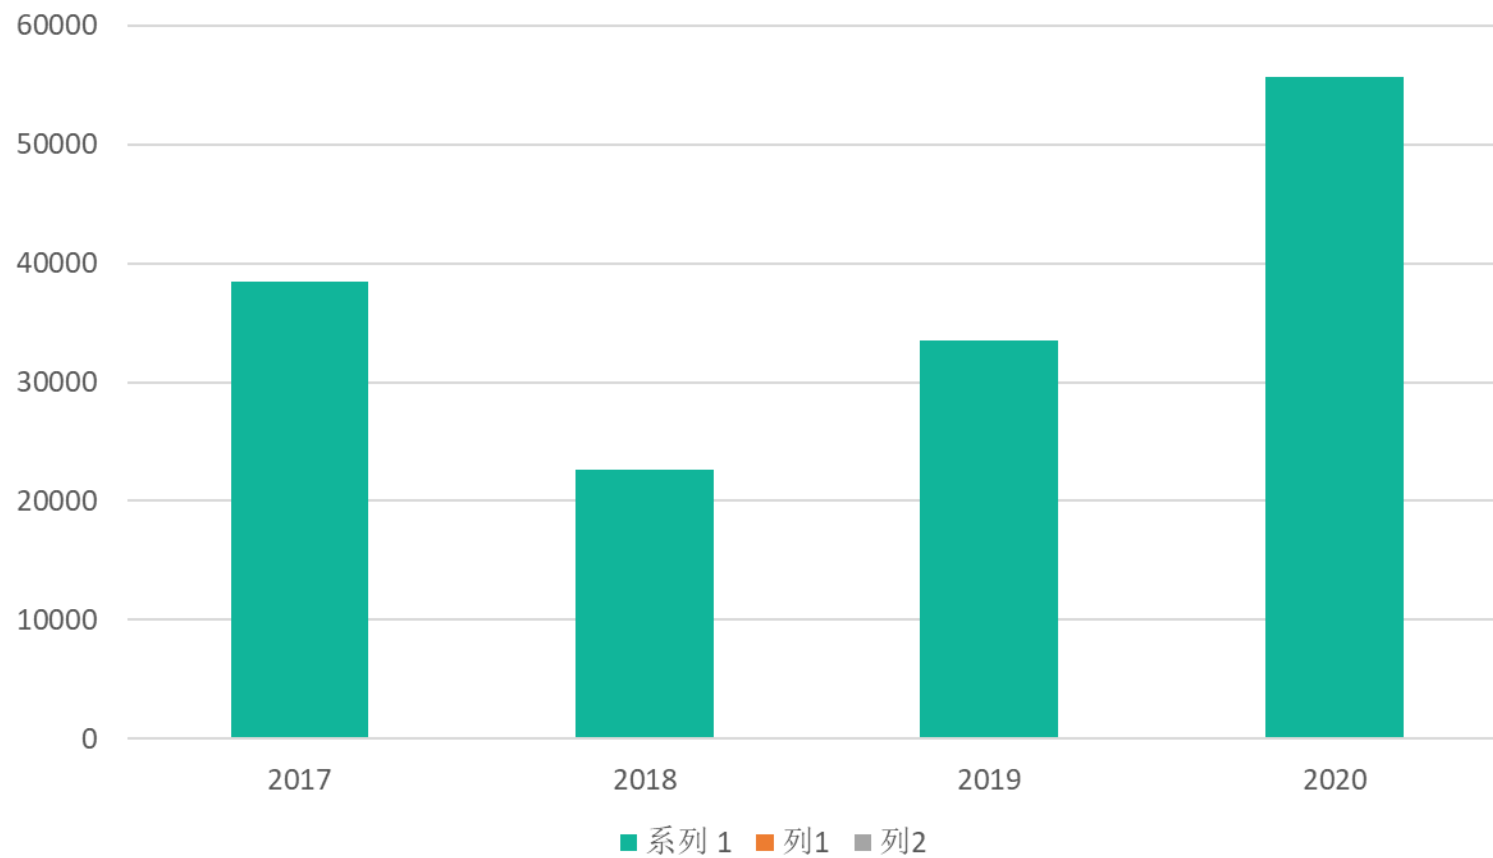

### **Special report**

# Changes in China raspberry production from 2017 to 2020

Year	production (Tons )
2017	38450
2018	22600
2019	33460
2020	55680

# Year, ton , diagram

# China's raspberry trade changes in 2019 (tons)

	Frozen raspberry	Fresh raspberry
International	12770	-----
Domestic	12380	8310

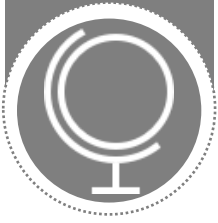

# Total raspberry area in China in 2019

Affected by the flood disaster in 2018, the planting area in 2019 was relatively large, and many farmers replanted the drowned raspberries. By the end of 2019, the total planting area of China's raspberries was 273,560 mu, or about 18,237.33 hectares. New planting places are: Anhui, Hunan, Henan, Hebei, Shandong, Liaoning, Neimenggu..... .

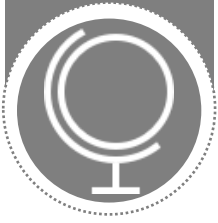

# Chinese medicine raspberry

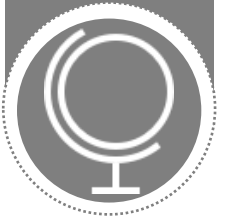

# Raspberry from Qinghai, China

# Raspberry from Liaoning, China

# The greenhouse grows raspberry

# Potted raspberry

# High-end raspberry products in China

# Chinese high-end raspberry white wine

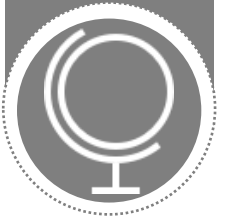

# The wheat fields after the storm

# Hail in China in May 2020

# Snow in China in May 2020

## Development status of raspberry in China:

- **China's climate in 2020 will be very unstable. In April and May, there were strong winds, heavy rain, hail and snow in many places, which affected crops like raspberries.**
- **The price of raspberry in 2020 is very good, many people invest in planting raspberry this year, hope that raspberry can develop rapidly in China, also hope to get the help and guidance of the international raspberry organization, China's raspberry market is very big, the prospect is very good.**
